Opp. PRL, Between Girls Polytechnic
and L.D.Engg.College,
Ahmedabad**

Saturday 23rd August 2014

Organized jointly by
**Ahmedabad Library Network (ADINET)
Information and Library Network (INFLIBNET) &
Knowledge Consortium of Gujarat (KCG)**

Librarians' Day 2014

ADINET in collaboration with INFLIBNET & KCG is celebrating the birth anniversary of Dr. S. R. Ranganathan (Father of LIS in India) as Librarians' Day on 23rd, August 2014

About the Seminar

The Seminar theme is
Libraries and Education – Vision 2020

The sub-themes are:

- **Skills and Competencies**
- **Impact of Technology on Libraries and Education**
- **Challenges in Collection Building**
- **Changing Needs of Library Users**

The incredible changes in technology which are continuing at an unprecedented rate have transformed Libraries into technological hubs. It has also revolutionized the education landscape and changed the teaching, learning and studying process.

There is a fundamental relationship between libraries, literacy, education and national development. Education and libraries are inseparable and indivisible. Education provides information, knowledge and skills. The Library preserves this information and knowledge and makes it available as and when required.

In order to bring about a transformation in libraries by the year 2020, we need to redefine our goals and our vision. Can we make libraries truly dynamic, so that more meaningful services can be provided through collaborative work, networking and resource sharing?

1 Skills and Competencies

It is well known that it is essential to learn, unlearn and relearn. Hence attending Refresher Courses, Training Programs etc. are extremely important in this age of rapid changes. In order to improve

library services, it is essential to stress on staff development. The capability, skills and aptitude of a person are important. But the main and essential component for both personal and professional growth is the attitude of the staff. This is extremely critical and crucial.

2 Impact of Technology on Libraries

Technology has eliminated space and time constraints. Online education and distance learning have given a new dimension to education and higher learning. Introduction of technology in education and in the library has made the process of learning and sharing of knowledge an interactive and enriching experience. Since a large number of college libraries have installed SOUL software developed by the INFLIBNET Centre we can focus more on an OCLC type of network for Co-operative Cataloging and also for retrospective conversion.

3 Challenges in Collection Building

Since decades libraries have been facing many challenges in meeting the demands of their users. Earlier the main issue was the exponential growth of information, the escalating costs and reduction in budget allocation. Together with these issues the additional main factor is the endless flow of digitized information.

4 Changing Needs of Library Users

Growth in Internet usage, a continuing increase and also availability of electronic resources continue to have a huge impact on the needs and expectations of users. It is therefore essential to identify and change library policies and services according to users' needs. Academic libraries need to change as per the changes in the academic environment. To provide online access to digital resources, the re-tasking of library space is essential by providing computer stations, e-readers, laptops etc.

Librarians will need to harness the sheer overabundance of information in this digital age & become facilitators to help users sort through this avalanche.
